

## **Wisconsin Wing Aircraft First Aid/ Survival Kit Equipment List**

This list is established in accordance with the requirements of CAPR 66-1 para 9f.

The following items are recommended items to be included in the aircrafts survival kit. Local units are encouraged to establish a kit to meet the needs of the unit.

### **Aviation First Aid Kit:**

Johnson and Johnson #170

Compass

Candle

State maps / Gazetteer

### **Survival Gear:**

Multi-tool Survival Knife (Option:  
carry two of these)

Firefly-2 Rescue Light

Hand crank Flashlight<sup>1</sup>

Small Flashlight/batteries

8 AA Battery Pack

Three (3) Emergency Survival

Thermal Blanket

Blankets

Rain Poncho

Signal mirror

Matches

Whistle

### **Hygiene Items:**

Roll Paper Towels<sup>2</sup>

Pocket pack Kleenex tissues

50' rope<sup>3</sup>

50-gallon garbage bags

Cloths (wash, bandage)

### **Food Items:**

MREs – Check expiration date

Option - Beef Jerky / Beef Stew (can  
opener)

Water<sup>4</sup> (Bottled / Canteen)

Plastic Bottle

Complete frequent inspection, preferably monthly, to verify there are no out dated or expired items. Any expired items will be removed and replaced.

Place the gear and other items preferably in a back pack. Although you are easier to be found if you remain with your aircraft, the back pack is easier to carry if you do have to relocate your position.

Mark your survival kit with the proper weight. Use this weight while completing the flights aircraft weight and balance charting. Ensure the allowable weight for Baggage areas two (2) in the C-172 and Hat shelf in the C-182 are not exceeded. While essential to survival, you will want to keep the pack as light as possible.
